Stadium ticket system administration

Arena Ticketing software allows the administrator to manage events, create different stadium layouts, create and correct pricing, activate sales channels for external vendors, enter ticket sale start / end.

Ticket System Features

- ☑ Administration enabled by authorized operator (login required)
- ☑ Creating a list of users and assigning / changing their rights and password
- ☑ Entering the names of the events, their start and end, pricelists and groups of seasonal tickets
- ☑ Entering ticketing times
- ☑ Logical stadium layout selection
- ☑ Creating / modifying ticket pricelists and seasonal tickets per an event, per each seat and a visitor category
- ☑ Creating Permanent Groups (e.g., seasonally, play-off, etc.) and for defined Visitor Categories
- ☑ Seasonal ticket selection with enabled entry to a defined event
- ☑ Assigning an external sales vendor to a sales channel, setting the sales method and time
